

“DIGGING IN”: WEEKLY IRRIGATION UPDATE

Week of May 21st, 2025

As HNT Services continues to progress with the Irrigation Replacement Project, holes #6, #7 and #8 are the next scheduled for work in the coming days. Hole #7 is nearly complete, and contractors will be putting the finishing touches on it this week.

As mentioned in last week's video, holes #6 and #8 will be worked on in combination. This approach allows contractors to install pipe and sprinklers in the ground and get water to key areas (greens and tee boxes), so the Turf Care team can irrigate those located as needed.

As we move through work on holes #6 and #8, please read all signage posted at the Pro Shop entrance, adhere to the first tee host instructions on hole closures, and read all signage posted on course with relevance to holes closed. Please do not remove any colored pin flags that are set in the ground. These are indicators for the Project Manager, Contractors, and Turf Care team, indicating the location on current or future sprinkler installations.

Please note that the sodded areas and trenches on hole #12 are still in recovery. During initial work, sod was stripped in advance of trench work and sprinkler installation. At that time, there was very little growth and recovery from the winter, and the sod was still very dormant as irrigation work began. If the sod does not recover, new sod will be laid in areas that require it. The Turf Care team and HNT Services are working together to ensure the finishing quality on each hole is completed to the highest standard. Throughout the Project, there will be areas on course that will take time to recover from trench work and slits from pulling pipes. We ask for your patience with these areas as normal visuals and aesthetics on course will be compromised for periods of time until the turf has recovered as work continues throughout the duration of the Project.

Please remember the golf course is considered a construction site. Remember to obey all directional signage when entering a hole under construction for your safety. Please exercise caution when entering the area and obey all directional signage and proceed with caution. Do not approach heavy equipment or irrigation contractors if they are using machinery as they may not see or hear you approach.

Best Regards,

Lance Morris
